## DETAILED ACTION

### ***Claim Objections***

1. Claims 4-11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-11 have not been further treated on the merits. Note that claim 3 is multiply dependent and thus claims 4 and following which are multiply dependent on claims 1-3 are in improper form.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Eda et al (JP 360260427A) (Eda).

4. As to claim 1, the electrode material consisting of at least one element from Group 1B, at least one element from Group 8 and at least one of S or Se is anticipated by Eda who discloses the use of the compound CuFeS<sub>2</sub> as an electrode material. Since this alloy conforms to the formulation of claim 1, and in that the mol ratios defined in claim 1 are an inherent consequence of the elements chosen for the alloy, the claim has been anticipated by Eda.

Art Unit: 2112

5. As to claim 2, Eda discloses a form of the specific alloy ( $\text{CuFeS}_2$ ) cited in the claim and hence this claim is anticipated.
6. As to claim 3, the claim cites a chalcopyrite structure. By definition "chalcopyrite" is a copper iron sulfide mineral and has the chemical composition of  $\text{CuFeS}_2$  and thus is anticipated by Eda.
